-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) Responsive to communication(s) filed on 19 February 2004.
- 2a) This action is FINAL.                    2b) This action is non-final.

**DETAILED ACTION**

***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over US patent number 6,420,203 (Okawa et al) in view of US patent number 6,324,067 (Nishiyama).

Regarding claims 1, 2, 4, 5, 8-10, Okawa et al discloses a condenser microphone comprising: a semiconductor device comprising: a conductive pattern (column 1 lines 12-20); a semiconductor element (11) placed on the conductive pattern; a fixed electrode layer (12) electrically connected to the semiconductor element; and a vibration film (16) provided to be opposed to the fixed electrode layer to provide another electrode of the condenser

Okawa et al does not disclose a sealing resin for integrally sealing the conductive pattern and the semiconductor element.

However, the sealing resin is well known in the art. For instance, Nishiyama discloses a resin for sealing components in a semiconductor device (column 1 lines38-48).

Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention was made to use this well known sealing resin.

Regarding claim 3, Okawa et al further discloses wherein the fixed electrode layer is electrically connected via a penetrated hole (116).

Regarding claim 6, 7 and 11, Okawa et al also shows wherein the semiconductor device, the fixed electrode layer, and the vibration film are stored in a case member and the semiconductor device is fixed via a substrate to the inner wall of the case member (see figures 3, 5).

### ***Conclusion***

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tuan D. Nguyen whose telephone number is (571) 272-8163. The examiner can normally be reached on M-F 6:30-3:00.
